## Worldwide reach

Great location and many years of experience are just a few of the many factors that contribute to the success of the JBG-2. Hundreds of satisfied customers especially appreciate our creative approach, flexibility and commitment to the successful implementation of each project. Our offer is a response to the broad requirements of the market, which is why we are gradually developing the line of Plug-in and Remote refrigeration equipment. Our devices work effectively in both small stores and huge hypermarkets around the world.

## Production plants

The company has State-of-the-art production plants, therefore each production stage guarantees a high level of equipment. Since the very beginning of our activities in 1989 ecology has been our main concern, both at the stage of the production itself and at the subsequent effect of our products on the environment. For the sake of quality, we carry out tests in our certified laboratories that meet the requirements of ISO 23953-2:2015. Quality management is based on the ISO 9001:2015 standard.
