

MANUFACTURER OF PROFESSIONAL
REFRIGERATION EQUIPMENT

ABOUT US

JBG-2 has been present in the professional refrigeration and catering equipment market for over 30 years. Since the company's founding in 1989, ecology has always been a key concern, both in production and in environmental sustainability.

To ensure the highest quality, **JBG-2** has certified laboratories that meet the requirements of ISO 23953-1:2023, ISO 23953-2:2023. Quality assurance is carried out in accordance with ISO 9001:2015. In addition, the company has implemented an ISO 14001:2015 environmental management system.

The **JBG-2** team always strives to work with full commitment to ensure that the collaboration with **JBG-2** remains satisfactory and long-term.

EQUIP

REMOTE

DESIGNED FOR NATURAL
refrigerants

Remote refrigeration units are refrigeration units without a built-in cooling unit, primarily intended for large retail outlets. These units can be arranged side by side in any configuration, making them easy to integrate into any space.

DESIGNED FOR NATURAL
(hydrocarbons) refrigerants

Plug-in units are refrigerated cabinets with integrated cooling units, eliminating the need for additional refrigeration systems. They simply need to be installed at the desired location in the store and connected to the power supply.

AROU

An aerial view of Earth from space, showing the curvature of the planet and the atmosphere. The sun is setting, creating a warm orange glow. The landmasses are visible, with city lights glowing in the dark areas. The water bodies are a deep blue. The overall scene is a dramatic and beautiful representation of our planet.

JBG-2

The leading manufacturer
of professional refrigeration
equipment for retail.

AND THE WORLD

JBG-2 is a renowned manufacturer dedicated to providing high-quality refrigeration solutions for the retail. With a commitment to innovation and excellence, we design and produce a wide range of refrigeration equipment that meets the diverse needs of our clients around the world.

Our products are engineered to deliver optimal performance and energy efficiency, ensuring that food and beverages are stored and displayed at the ideal temperatures. From commercial refrigerators and freezers to custom-built solutions, **JBG-2** stands at the forefront of technology, helping businesses thrive in a competitive market.
