About us

Many years of experience, state-of-the-art production plant and great location are the few of many factors that contribute to JBG-2's success. Hundreds of satisfied customers around the world especially appreciate our creative approach, flexibility and commitment to the successful completion of every project.

Since the very beginning of our activities in 1989 ecology has been our main concern, both at the stage of the production itself and at the subsequent effect of our products on the environment.

For the sake of quality, we carry out tests in our certified laboratories that meet the requirements of ISO 23953-2:2015. Quality management is based on the ISO 9001:2015 standard.

We are not only manufacturer of refrigeration equipment. Based on many years of experience we created new brand named JBGPV. It is a production of photovoltaic modules, which fits perfectly into the company's portfolio and it makes it even more effective and ecological.

Our team is always ready to go the extra mile to make the cooperation with us successful, satisfying and sustainable.

For over 20 years of our activities, JBG-2 has been awarded with prestigious honor on numerous occasions, for dynamic growth in the refrigeration equipment market.

The NO Defrost system has been valued by the RAC Cooling Awards. We managed to achieve the final stage in 2016 and 2018 in this prestigious competition. Furthermore the energy-efficient solutions have been qualified to the TOP TEN program. In addition, the effort put into improving our devices meant that they got to the prestigious Energy Technology List.

Awards

HIGHLY COMMENDED

This is the jury's distinction in the RAC Cooling Awards final for a device awarded with a high recommendation as a product containing many „best-in-class“ solutions.

Our equipment Garmo RDGA-L4-2500, Pamir WDPa-01-1530 and WNPA-01-1530 eco version have been classified to governmental project in Switzerland and Austria. Clients from those countries who will buy devices from Top Ten List can apply for the partial refund of purchase this government program.

On behalf of the UK government Carbon Trust is managed the list of Energy-saving devices (The Energy Technology List). It publishes the devices which have been qualified to promotion of energy efficiency programme (Enhanced Capital Allowance scheme). This programme allows for the tax breaks in connection with using so-called green technology.

The background is a solid light blue-grey color. It features several large, flowing, wavy lines in a slightly darker shade of blue-grey. A single, thin, vibrant purple line curves across the upper portion of the image, starting from the left edge and ending on the right. The overall aesthetic is modern and minimalist.

REMOTE

Multidecks

REMOTE

Our desire for continuous improvement and innovation has led us to develop systems and solutions that reduce environmental impact. That is why we have developed a system that eliminates defrost cycle and lowers the energy use.

Cabinets

REMOTE

It is typically people with busy lifestyles who are shopping for frozen products. Good arrangement of a store can save a lot of time while shopping. That is why design of our cabinets is about good visibility and ergonomics. Easy to choose – easy to reach. But when there is no perfect match for interior requirements, then the only solution is to mix. Our line of mix cabinets is a customized solution, so you do not have to compromise anymore – you just have a broad range of equipment to choose from.

Counters

HOT CASES

Ideal for the busy restaurant or food service outlet, our range of hot cases use hot lamps, heated elements or Bain marie's and can be multiplexed with chilled counters from the same range.

Grazia LGGR-28

GSL | BSA

STANDARD FEATURES

- hot cases: Bain Marie / Hot plate
- temperature up to +85°C
- electronic controller with temperature indicator / for Bain Marie additionally a mechanical thermometer at the air inlet
- feature of the heating element – heating plate (for hot case) / heating bath (for Bain Marie)
- lighting panel: IR heating lamp (for GSL)
- exposition: stainless steel H18
- external surfaces (front / base): zinc-plated steel, powder coated
- exposition on a full base

Cabinets

PLUG-IN

It is typically people with busy lifestyles who are shopping for frozen products. Good arrangement of a store can save a lot of time while shopping. That is why design of our cabinets is about good visibility and ergonomics. Easy to choose – easy to reach. But when there is no perfect match for interior requirements, then the only solution is to mix. Our line of mix cabinets is a customized solution, so you do not have to compromise anymore – you just have a broad range of equipment to choose from.

Elegant RDEL-05 GBT

STANDARD FEATURES

- working temperature – straight modules from 0°C to 2°C; corner NW45 from 2°C to 4°C; corner NZ45 from 4°C to 8°C
- refrigerant: R290
- electrical defrosting
- automatic evaporation of condensate
- electronic controller with temperature indicator
- exposition: 3 suspended glass shelves + bottom made of powder coated, zinc-coated metal plate
- shelves support and bottom shelf in grey color RAL 7004
- back doors, sliding, double glazed (in corner and 0600 modules hinged door)
- lighting – top and each shelf – energy-saving, LEDit, WW-2
- sidewalls integrated with thermopane glass, with silk-screen painting

Energy efficiency classes

The energy efficiency class of a refrigerating appliance with a direct sales function shall be determined on the basis of its EEI as set out in Table.

Energy efficiency classes of refrigerating appliances with a direct sales function

ENERGY EFFICIENCY CLASS	EEI
 A	$EEI < 10$
 B	$10 \leq EEI < 20$
 C	$20 \leq EEI < 35$
 D	$35 \leq EEI < 50$
 E	$50 \leq EEI < 65$
 F	$65 \leq EEI < 80$
 G	$EEI \geq 80$

Designation of the energy efficiency class is dedicated to a particular products, which are presented on each page of the catalogue. Indicated energy efficiency class depends on a module type, equipment, glassing version and type of a refrigerant. Amendment of each of the said parameters may cause amendment of the energy efficiency class. Contact the manufacturer to acknowledge the energy efficiency class for the product with different parameters to those presented in the catalogue.

Products shown in the catalogue are just examples and do not constitute an offer as such.
The manufacturer reserves the right to alter the features and technical specifications of its products.
If it is not clearly defined temperature ranges presented in this document are for shop conditions
(20C/50RH).
